Algonquin's Reliable Affordable Resilient Enhancement

The Northeast has endured some of the highest energy prices in the nation; the combination of high demand, colder-than-normal temperatures and system constraints have resulted in considerable economic strain on households and businesses throughout the region.

Algonquin Gas Transmission, LLC has proposed a new enhancement that will help provide stability in the marketplace. Algonquin's Reliable Affordable Resilient Enhancement (AGT Enhancement) is the first step in alleviating the bottleneck of pipeline constraints that have plagued the region, helping to enhance peak-day capacity.

This is a targeted enhancement of existing pipeline infrastructure which is designed to upgrade our existing system within, or adjacent to, existing rights-of-way. This Algonquin enhancement will center around already existing infrastructure and will not require construction at any existing compressor stations, or any new compressor stations.

Within Massachusetts, pipeline enhancements will occur in the towns of Mendon, Bellingham, Franklin and Wrentham. Upgrades in Rhode Island will take place in Cumberland, Little Compton, Tiverton and Burrillville. Subject to receipt of all necessary regulatory approvals, this work is expected to take place in 2029, with an in-service date expected in late 2029.

As part of our commitment to being good neighbors, we are engaging with community members, advocacy groups and local officials to understand any questions and incorporate feedback into project planning and execution.

Should you have any questions, please contact a project representative at 855-763-0055.

Project overview:

- **Type:** Natural gas pipeline expansion
- **Status:** Proposed

- **Capacity expansion:** 75 MMcf/d
 - **Expected to transport:** Natural gas
 - **In-service target date:** 2029
 - **Ownership:** Enbridge
 - **Operator:** Algonquin Gas Transmission, LLC
-

Project Information:

Regulatory Information

The AGT Enhancement will require close coordination with federal and state agencies, along with local utilities.
